WBU-ISOG Interoperability Testing

Lisa Hobbs
Vice President Business Development, Satellite & Broadcast
TANDBERG Television, Part of the Ericsson Group

Agenda

- Test results
- Importance of ISOG testing
- Proposed next steps

Test results

- Greatly encouraged vs early days of MPEG-2 interoperability testing
- Relatively few issues uncovered for the first round of testing
- Cooperation among vendors to provide/exchange transport streams clearly in best interests of end users around the world

Importance of ISOG testing

- Facilitates cooperation among otherwise competing vendors
- ISOG is a neutral organization
- Easiest way to answer the question: do you work with vendor XYZ?

Proposed next steps

- Continue with once-a-year interoperability testing
- Change/expand scope of tests as technology changes
- Keep the tests within the confines of the standards being tested
